

Corse and Staunton Village Hall

We have had another busy year with the hall being hired most weekdays for local villagers to access. There have also been a number of children's parties and even a couple of weddings. We also have regular bookings for a dog group, a bird group, rock and roll and hardy plants, so the hall is being well utilised which is excellent.

The down side is the upkeep due to such regular use, maintenance and cleaning especially but also keeping the hall heated means our oil bill has been higher than previous years. We have had many fundraising events to help add to our funds and have more planned for this year.

We have also paid over £2000 to get the roof (fingers crossed) water proof, this has been an ongoing issue and at last we have found someone to help us sort the problem.

We now have an issue with the carpark which needs repairs and a more defined parking area for disabled users. We are going to be looking at grants for this work as it could prove to be quite expensive.

If the Parish Councils can help at all this would be very gratefully received.
